## High speed crime spree hits road block at locksmith's front door

### *Burglary ring can't get past Maxum® Deadbolt*

Husband and wife locksmith team, Jim and Pamela Peters, practice what they preach. They installed Medeco double cylinder Maxum deadbolt locks on all the exterior door of their home, the same lock they sell at Jim's Lock & Safe, their Central Avenue locksmith business.

On July 3, a brash quartet of burglars began a smash and grab crime spree in Kansas City suburb of Basehor, in the Peter's neighborhood. The burglars' plan was to kick down doors, grab what they could and run. They met their match at the Peters' back door.

According to a neighbor, after trying all three doors, the biggest of the four burglars tried to kick open the Peters' back door ten times. They finally gave up as police closed in. The four criminals were caught after a 20-minute high-speed chase.

When the Peters' went home to check their property they found that their steel-frame

door had buckled, but the Medeco double cylinder Maxum deadbolt lock held firm under the repeated pounding.

"I was relieved but not surprised," said Jim Peters. "We're a Medeco dealer and I'm familiar with their products. Now I know first hand how well they work. Quality locks are one of the most important parts of a modern security system."

Pamela Peters says the experience has actually given them more piece of mind when it comes to security.

"Our family could have been behind that door as the criminals pounded to get in," she said. "It's comforting to know our locks can keep them out."
